

Heartbreak

Lyrics Sheet

[Verse 1]

In twilight's hush, where shadows play

I see your face, and fade away

The ache within, a hollowed space

A love now lost, a distant, fading place

[Chorus]

Oh, the night it weeps, with tears untold

A lonely heart, where love grows old

In darkness deep, I search for light

A guiding star, to lead me through the night

[Verse 2]

Memories of you, a haunting refrain

Echoes of laughter, now in vain

The silence screams, a deafening sound

A solitude, that wraps me 'round

[Chorus]

Oh, the night it weeps, with tears untold

A lonely heart, where love grows old

In darkness deep, I search for light

A guiding star, to lead me through the night
